

PLANTDECK-LOUVRE SYSTEM

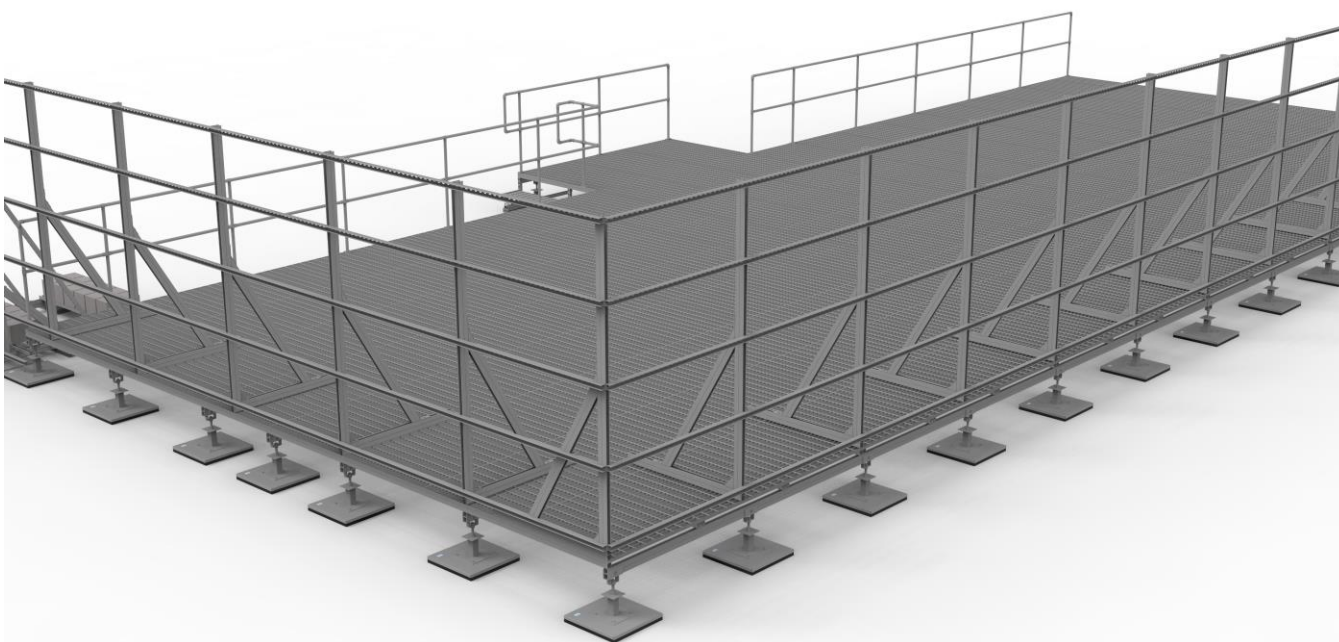

Roof Runner provides a versatile Plant Deck Framework System designed to support and manage building services, equipment, and access solutions efficiently. This fully adjustable system can be easily modified to meet evolving needs and supports all services independently of the roof structure. Ideal for both new installations and renovations, Roof Runner offers a flexible, durable solution tailored to the dynamic demands of contemporary building projects

PLANTDECK-LOUVRE SYSTEM

ROOFRUNNER

Key Features

- Cost Effective UK Manufactured Bespoke Systems
- Simpler and clearer routing for Pipework & Electrical containment
- Easily removable flooring sections for service and maintenance
- No requirement of separate counterweight/ballast loading to withstand the system
- GRP flooring available for lighter loading facilities
- No requirement of separate access system, inbuilt with the plant deck
- Saving on Installation time compared to installation of separate frames
- Lighter combined system for lower load specification roof structures

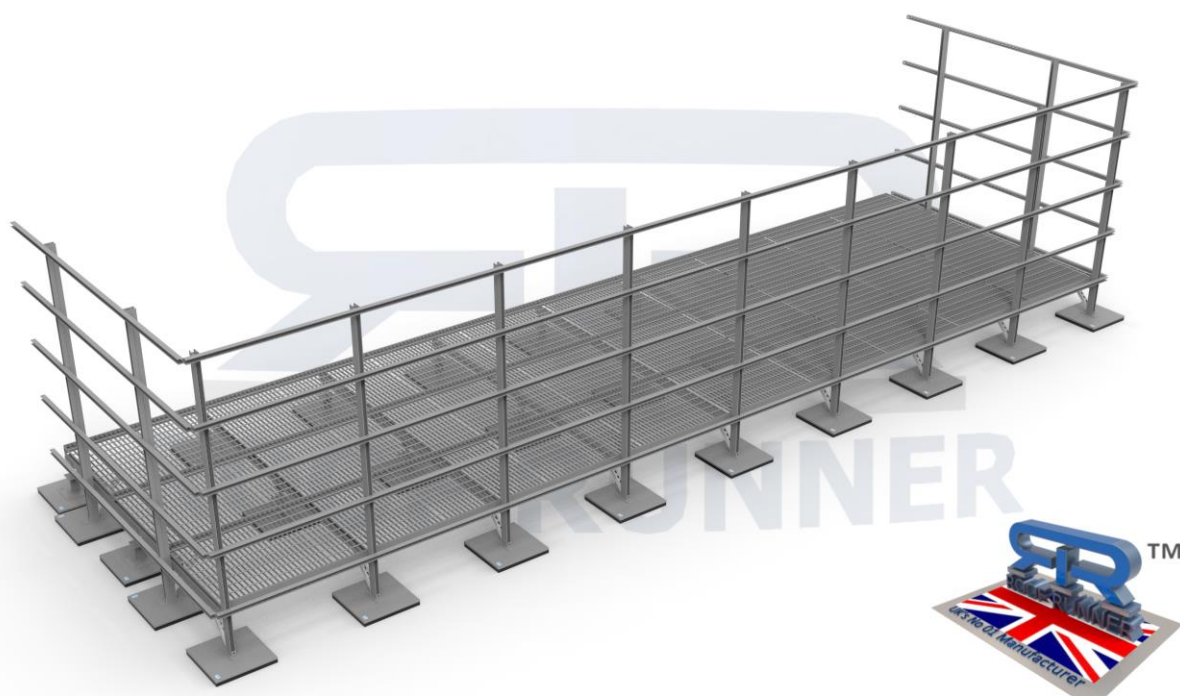

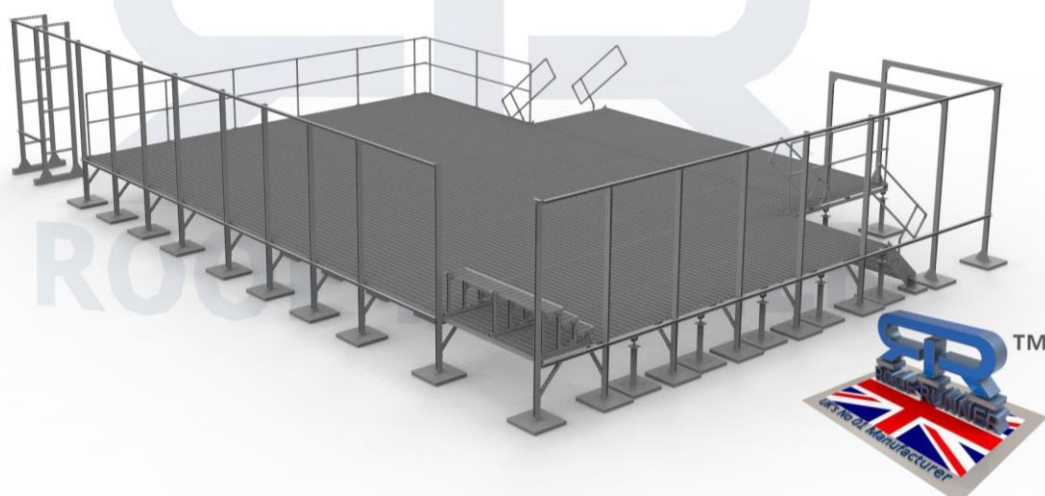

Roof Runner plant deck systems are built to handle various loads and applications, available as standard products or customized to meet specific specifications.
